

TONSAI THREETAN

AUTOMATION ENGINEER

(+66) 089 770 3251 | tonsai.email@gmail.com | github.com/tonsai987654321 |

linkedin.com/in/tonsai-threetan

PROFILE

Automation Engineer with **2+ years** of hands-on automation experience across AI, chatbot, and web systems. Built automated test suites using **Robot Framework** and **Playwright** that cut execution time by **89%** (90 min → 10 min per 100 test rounds). Skilled in writing test plans from requirements, designing test cases for happy/bad/off-topic paths, and coordinating quality across sprint cycles. Leverages LLM tools (Claude Code, GitHub Copilot) to accelerate test script generation and debugging.

EXPERIENCE

Botnoi Group Co., Ltd.

Aug 2024 – Present

Project Manager

- Owned test planning end-to-end: defined test scope, wrote acceptance criteria from business requirements, coordinated UAT with stakeholders, and tracked defects in **Jira**.
- Used **Robot Framework** for automated regression testing and **Pywinauto** for desktop automation, ensuring quality across AI-powered product releases.
- Translated complex business requirements into clear test specifications, reducing rework and resolving functional ambiguities before development began.
- Served as primary QA liaison between developers, clients, and stakeholders — triaging bugs and verifying release readiness across sprint cycles.
- Engineered reusable **AI skills for Claude, Gemini, and Codex** — enabling models to autonomously generate test cases, validate chatbot flows, and produce QA documentation from plain-language requirements.

Botnoi Group Co., Ltd.

Apr 2024 – Present

Chatbot QA / Journey Expert

- Automated LLM chatbot testing** to detect and mitigate hallucinations by simulating repetitive conversation scenarios at scale.
- Reduced test execution time by 89%** — from 90 minutes to 10 minutes per 100 test rounds — while maintaining full coverage of response quality.
- Designed test scenarios covering happy path, bad path, and off-topic handling for complex chatbot conversation flows.
- Analyzed chatbot performance and user behavior data to identify quality issues and drive continuous UX improvements.

SKILLS

TEST AUTOMATION

Robot Framework Playwright Pywinauto
pytest

AI / LLM TESTING

Hallucination detection NLU validation
LLM evaluation

LANGUAGES

Python Dart SQL

TOOLS & PLATFORMS

Jira Git GitHub Actions
Dialogflow ES/CX MongoDB N8N

AI-ASSISTED DEVELOPMENT

Claude (Claude Code) GitHub Copilot
Codex Gemini

AI SKILL ENGINEERING

LLM skill design Test case generation
Chatbot flow automation
Prompt engineering

METHODOLOGY

Agile/Scrum Test case design
Defect tracking

EDUCATION

Burapha University

B.Sc. Mathematics · 2019 – 2022

KEY ACHIEVEMENT

89% Faster Test Execution

Reduced chatbot regression testing from **90 min** → **10 min** per 100 rounds using Python automation while maintaining full coverage.

EXPERIENCE (CONTINUED)

Botnoi Group Co., Ltd.

Apr 2023 – Apr 2024

Technical Support / QA

- Executed comprehensive manual and exploratory testing for **Dialogflow ES/CX** voice bot flows, validating intent recognition accuracy before production deployment.
- Developed **Python-based automation tools** for test data preparation and cleaning, reducing setup time for test runs.
- Built a Python PoC to automate MongoDB scaling — reducing scale-down latency from 24 hours to real-time, cutting estimated costs by ~\$83/month per instance.
- Managed defect tracking and developer coordination via **Jira** and Slack across multiple voice bot projects.

Freewill Solutions Co., Ltd.

Apr 2022 – Oct 2022

Software Developer Intern (Co-op)

- Performed manual testing on mobile application flows built with Flutter, identifying and documenting UI/UX defects prior to release.
- Developed and shipped a cross-platform **mobile application using Flutter** (Dart), implementing UI screens, navigation, and integration with backend APIs.
- Gathered functional requirements and translated them into test scenarios covering core user journeys.
- Contributed to UX design reviews using Figma, providing quality feedback before development handoff.

PORTFOLIO PROJECTS

1. Playwright E2E Test Suite Complete

github.com/tonsai987654321/playwright-e2e-tests

Web UI automation framework for an e-commerce demo site built with **Playwright + Python** using Page Object Model pattern. **8 tests** across login, browse, cart, and checkout flows. Includes GitHub Actions CI pipeline and Allure HTML reporting.

[Playwright](#) [Python](#) [POM](#) [GitHub Actions](#) [Allure](#)

2. Robot Framework API Test Suite Complete

github.com/tonsai987654321/robot-api-tests · [Live Report](#)

Keyword-driven API test suite using **Robot Framework + RequestsLibrary** targeting a public REST API. **15 tests** covering CRUD operations, auth, error handling, and edge cases. Auto-publishes HTML reports to GitHub Pages on every push via CI.

3. LLM Response Quality Evaluator Complete

github.com/tonsai987654321/llm-quality-evaluator · [Live Report](#)

pytest-based framework that evaluates LLM responses across latency, consistency, and hallucination dimensions using an OpenAI-compatible API. **17 tests** with scoring across 3 quality dimensions. Generates self-contained HTML report published live via GitHub Actions CI.
